

Project Brief: Boutique Coffee House

Built around you.®

I'll have a short triple hung...

The flexibility and adaptability of Marvin® Windows and Doors was prominently on display at this popular Calgary establishment. When the order was placed for window renovations, size became an issue. Triple hung windows were desired. But standard sized triple hungs couldn't fit into the available space. That's when Marvin Windows and Doors went to work.

PROJECT HIGHLIGHTS:

Name: Boutique Coffee House

Location: Calgary, Alberta

Project Type: Renovation

Building Type: Commercial (Small Business)

Product Series: Double Hung

Product Types: Marvin wood EZ Tilt DHs in a reverse cottage cut with the top sash SDLs simulating a triple hung

MARVIN SERVED UP THE RIGHT SOLUTION.

Marvin wood EZ Tilt DHs in a reverse cottage cut with the top sash SDLs simulating a triple hung provided the perfect answer. Marvin offers design possibilities with unequal sash configurations such as the reverse cottage cut. These types of options offer greater aesthetic and accessibility capabilities for both residential and commercial projects. Matching an existing architectural style – or creating a new one – is easier, and accessibility is improved thanks to the ability to vary the checkrail height for universal design concerns. When the order is unique, trust Marvin Windows and Doors of Canada to deliver.
